

Welcome
to the 7th
Bergforsk Conference

1. Safety first

2. Important achievements since last meeting in May 2010:
 1. National level
 2. European level

3. What's ahead on a:
 1. National level
 2. European level

The outlook for the mining industry has never been better

- On a national level:

- Mine of the Future- final report presented. An important document where the swedish mining industry and academia established consensus on future goals for the industry by 2030.
- A strategy for the swedish mining and minerals industry- a first conceptual draft written by the Swedish Geological Survey (SGU). Still a lot to do, but the first important step is taken.

- On a European level:

- Raw Material Initiative(RMI):an updated information information from the Commission
- Innovation Union: a proposal about 10 pilot plants within the European Innovation Partnership (EIP)
- IntelliMine: submitted to the Commission the 28th of April

- **The coming year: a wish list**

National level:

- A new Research program for the Mining industry.
- A national strategy for the mining and minerals industry
- A successful recruiting of new students to our Mining University

European level:

- A new frame program (FP8) where raw material supply plays an important role
- A decision about European Innovation Partnership also covering raw materials

Today's program

- Breaks and lunch (at 10 am and 12)
- Press conference (at 1 pm)
- Closure of day 1 (at 5.30 pm)
- Dinner (at 7 pm)
