

Undoing gender in the innovation system of the Swedish mining industry

Aims:

- **Define** and **delineate** the innovation system of the Swedish mining industry
- **Identify** and **describe** gendered **patterns**, **structures** and **discourses** of R&I-system and mining industry

Results:

- The Swedish R&I-system **is gendered**, but undergoing fundamental change (e.g. increased **gender-awareness**)
- Internationally, **gender is about women** (how they should be to fit in and why/how mining is a problem for women)

Methods and participants:

- **Interviews** with actors from academia/industry and intersecting organizations
- **Texts** on *gender and diversity in mining* generated by WebCorp Live.
