Call 2019

SIP | STRIM

Towards a sustainable development in the mining and metal extraction industry

In this offer, we finance short-term feasibility studies, full-scale innovation projects or pilot projects that meet the challenges defined in the STRIM agenda for sustainable mining and metal extraction.

Goal with funding?

- contribute to **Sweden's competitiveness** in the mining and metal-extracting sector
- contribute to **sustainable development** in the mining and metal-extracting sector
- get more people to **work together to develop their innovation capacity** and create new solutions that contribute to the goals for sustainable development in Agenda 2030, within the framework of the priorities of the call
- Contribute to increased **gender equality** by enabling that;
 - both women and men part in the grant
 - both women and men influence over the project
 - both women and men participate actively in its implementation
 - the project results benefit both women and men

SIP STRIM annual open call

Type of projects

- Pre-studies
- Full scale innovation projects
- Pilot projects

Open for

- All stakeholders that can contribute to SIP STRIMs goals and vision

Important dates

- Call opens: 15 May 2019
- Call closes: 7 November 2019 at 14.00
- Call result is communicated latest: 20 February 2020
- Earliest starting date: 1 March 2020
- Latest starting date: 1 June 2020

Pre-studie

- Aiming at developing, verifying and validating the potential of possible future full scale projects
- max 6 months duration, max funding 500 KSEK, 25 % co-funding
- The pre-study project has to show industrial relevance through a letter of intent from at least one industrial partner
- Project summary shall be sent to the SIP STRIM secretariat

Full scale innovation projects

- Aiming at implementing ideas that contribute to the realisation of SIP STRIMs goals and vision
- Focus on innovation and industrial engagement
- Project consortium has to consist of at least two industrial partners and one research partner
- TRL 4-7
- max 36 month duration
- max funding 10 MSEK, 50 % co-funding (cash or in-kind is required)
- Project summary shall be sent to the SIP STRIM secretariat

Pilot projects

- Aiming at demonstration, test or implementation of new technology, methods or processes
- Focus on innovation and industrial engagement
- TRL 5-7
- Project consortium has to consist of at least two industrial partners and one academic partner
- max 18 months duration
- 50 % co-funding (cash or in-kind) is required
- Project summary shall be sent to the SIP STRIM secretariat

Assessment process

- Criterias
 - Potential
 - Feasibility
 - Actors
- International evaluation group
